

Code for Good

United Way of San Antonio
and Bexar County

Prepared by:
Hera Memon Helena Wu Clara Ho Vyas Ramankulangara Gideon Akilas

Challenge Statement

- An effective way to **visualize** its monthly aggregate program performance data
- **Build a platform** that can help United Way efficiently view and analyze complex data models in a longitudinal and/or year-to-date format.
- There should be multiple visualizations views to represent the data for **different users**
- **Compare performance data** against performance targets.

Tons of visualizations!

TEAM 10 SOLUTION

We got you!

- Used an **open source visualization tool** to display super awesome graphs!
- The visualizations **cater to both the internal staff and general public.**
- Created a graph that **aggregates monthly data.**
- Built a graph that **compares performance data** against target performance data.

DEMO!

Why choose our solution?

- Our solution addresses the client's needs of providing engaging visualizations for the general public and internal staff.
- Simple authentication for employers to view internal data.
- Keeps private information hidden from public.

Next STEPS

For feasibility

- Further divide data based on indicators and strategies.

For sustainability

- Archive and filter historical data.
- Status reports and notifications for internal staff.

Thank You!
